ANTI-AI ART PRACTICE

zine by steel
transplants

Philosophy

Environment: AI uses fresh water to cool heating systems and requires massive amounts of energy. Billions of gallons of water are used for AI each year.

Data centers are built on stolen land and contribute to environmental racism (Harvard Review).

Funding: Chat GPT is funded by MAGA supporters and trump (quitchatgpt.org).

META platforms that use AI are funded by billionaires who invest in AI data centers.

History: Analog art methods are a part of our artist & activist lineages. We must keep it alive and archived!

Personal note: As a lifelong art maker and art therapy student, I know the power of connection by embodied art making that is cognitive, physical and spiritual.
