Building Community Alternatives

Anything that strengthens your community & weakens your oppressors

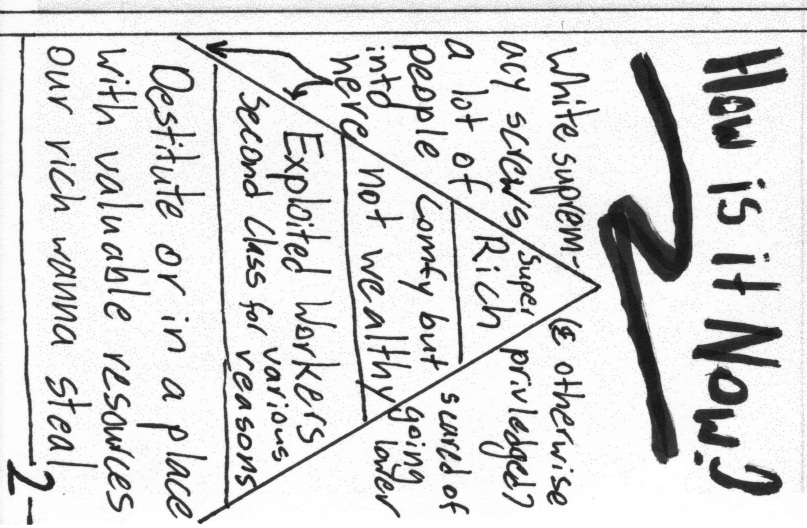

Get Creative

Put your imagination toward the future that you want, not toward imagining the worst your oppressors will do. Don't waste it!

Start Small

Burning yourself out doesn't help anyone & is the easiest way to get discouraged. Instead set achievable short-term goals that move your project forward & let it develop as it needs to. Don't try and plan the perfect org. Let it come together out of shared need + values and go from there

- Police Restrictions
- Brutality on free speech
- Bloated Military
- Interference in foreign
- Segregated Government
- Cities Starved Education
- Suburbs Society Wide
- Transphobic Emotional Stunting
- Ableism
- Racism
- Sexism
- Homophobia
- Shoddy Cheaply made Infrastructure products
- Lack of massive plant variety
- Corporate Loss of Monopolies
- practical skills

The quality of life improvements we'll make together!

Let your interests & skills guide you!

Match them up with any community need! If you like to sew, mend clothes for people, if you like to garden, grow food to share! If you know plumbing, gas or electrical, home maintenance in general, share those skills!

we don't last long enough
for people to learn how
and why to participate.
